

**Dr. R. Scot Duncan** is an Associate Professor of Biology and Urban Environmental Studies at Birmingham-Southern College. Originally from Pensacola, Florida, Scot received a BS in Biology from Eckerd College in 1993, a MS from University of Florida in Zoology in 1997, and a PhD from UF in Zoology in 2001. His research on ecology and conservation biology has taken him to Costa Rica, Panama, Uganda, Florida, and Alabama. Scot took a position at BSC in 2002 and teaches courses in conservation, ecology, and environmental studies. He and his students are currently studying the ecology of endangered species and threatened ecosystems, including the Ketona dolomite glades, montane Longleaf Pine woodlands, and the Watercress Darter. Scot is the author of *Southern Wonder: Alabama's Surprising Biodiversity*. Written for the layperson, the book interweaves the disciplines of ecology, evolution, and geology into an explanation of why Alabama is home to more species than any other state east of the Mississippi River. *Southern Wonder* (now in its second printing) was published in November 2013 by the University of Alabama Press, and the foreword was written by Alabama native and distinguished scientist, Dr. Edward O. Wilson. *Southern Wonder* won the Southern Environmental Law Center's 2014 Phil Reed Environmental Writing Award, and the Southeastern Library Association's 2013 Overall Excellence: Hard Cover Award.
